Next, unscrew the two screws, as shown, and store them in a ZipLock bag.

Now, you will need to remove the cigarette lighter / aux port assembly from the console. To do this press on the two tabs (there is one visible in this picture. The other tab is indicated by the arrow) located on the cigarette lighter / aux port assembly and inside the console, and push the assembly outwards.

The removal of this assembly reveals two bolts and two screws that you will need to remove in order to locate the CD Changer wiring.

Remove the two bolts and the two screws and place them in a ZipLock bag. Take great care when removing these items for they can easily drop or be misplaced.

Once these items are removed, the console assembly can easily be lifted up.

You do not have to remove
